### **About this course:**

#### **What will I study?**

The MSc in Global Logistics, Operations and Supply Chain Management has been designed to enable you to acquire an in-depth understanding of the major areas of knowledge and philosophical approaches that underpin the concept of the Global Supply Process. The programme philosophy is to develop this knowledge and understanding of the specialist area of supply chain management, whilst placing it firmly within an organisational context. This programme is also available as MSc Global Logistics, Operations and Supply Chain Management with Advanced

Practice which includes either an internship or group consultancy project. In addition to the development of both specialist and the wider organisational knowledge, Developing Global Management Competencies I and II will enhance your personal development through the acquisition of transferable, intellectual and personal skills, which is particularly focused on developing managers with both emotional, cultural and business intelligence.

The programme will facilitate the development of a critical appreciation and reflection of contemporary global supply chain process issues as well as provide opportunities to challenge established approaches to management and emerging paradigms (e.g. Sustainable Supply Chains), whilst enabling you to reflect upon your own personal development. The approach adopted of linking particular specialisms with general management theory and personal development is seen as major development need within the specialist management of Global Supply. This course combines management studies with a strong specialist focus on operations, logistics and supply chain management (LCSM). The specialist LCSM modules cover strategic procurement, sustainable supply chains, improving the supply chain, and strategic partnerships. The course culminates in either a masters dissertation or, if you prefer, a consultancy project where you'll tackle an issue faced by a real client.

This programme is accredited by the Chartered Institute of Purchasing and Supply (CIPS) and the Chartered Institute of Logistics and Transport (CILT).

This programme is also available as MSc Global Logistics, Operations and Supply Chain Management with Advanced Practice which includes either an internship or project.

#### **How will I be taught and assessed?**

**NEW START4U CIC**  
024 7767 1470  
info@new-start4u.co.uk  
12-14 Riley Square,  
Coventry CV2 1LX, UK

You will be taught through a mixture of lectures, seminars and workshops, totalling around 14 hours per week. You will also be expected to engage in independent study involving directed and self-directed learning, around 33 hours per week.

Assessment is based on exams and coursework, including presentations.

You'll be taught by experienced lecturers and academics who use their industry experience to demonstrate how the theories you will learn translate in to real life situations.

Technology Enhanced Learning (TEL) is embedded throughout the course with tools such as the 'Blackboard' eLearning Portal and electronic reading lists that will guide your preparation for seminars and independent research.

### **Careers and further study**

Graduates can expect to secure roles in areas such as Operations Management, Materials Management, Purchasing and Quality Management. Typical roles include:

- . Supplier Quality Manager
- . Transport Consultant
- . Distribution Services Manager
- . E-commerce Operations Manager
- . Freight Account Manager
- . Logistics Project Manager

### **Entry requirements**

Academic requirements

A first degree, equivalent to a 2.2 honours classification in any discipline, although they may cover Business and Management, Operations Management, Engineering or Transportation.

If you don't meet the academic requirements

Applicants who do not have such an academic qualification but do have substantial experience of working in a business organisation and/or possess a relevant professional qualification will also be considered. Whilst you are welcome to apply because of your relevant work experience, you must have a clear commitment to a professional career that comprises one of the areas of logistics, operations management or supply chain management.

Applications will be considered on an individual basis.

Alternatively, you may also be eligible for our Pre-Masters courses. These are programmes designed specifically for students who are looking to progress on to a Masters degree.

### **English language requirements**

Students require IELTS 6.5 (or above) with no single element below 6.0 or equivalent.

If you have IELTS 5.5 – 6.0, you may be eligible to join our Pre-Sessional English before starting this programme.

### **Modules**

All modules on this course are core unless otherwise stated.

#### **LD0472 - Developing Global Management Competencies I (20 credits)**

This module is the first of two that prepares you to be highly employable, and enables you to demonstrate your ability to make an immediate impact on your organisation of choice.

It develops key hard and soft skills which have been identified by current research as those necessary for postgraduate students seeking work.

#### **LD0493 - Strategic Partnership and Value Creation (20 credits)**

This module is designed to equip you with the necessary knowledge, skills and techniques to be able to formulate Logistics and Supply Chain Management understanding of Strategic Supply Chain Relationship Management. The module covers the contribution of Logistics and Supply Chain Management to organizational strategy. Exposure to newer developments in this area will allow you to evaluate and assess the potential for their adoption as complementary or alternative procedures in Supply Chain Management in addition to evaluating a manufacturing organization via Business Simulation.

#### **LD0494 - Operations and Supply Chain Improvement (20 credits)**

The module aims to provide an introduction to improvement of operations and supply chain in local, national and international context with particular attention to the quality and efficiency context, and with some focus on global aspects. Furthermore, the module aims to provide this underpinning knowledge whilst investigating the ongoing developments in theory and practice.

In this challenging environment, there are concepts, tools and methods that managers can use to deal with operating problems in a global environment. The mission of this module is to provide you with a comprehensive framework for addressing operational and supply chain issues, challenges, tools and strategies in global context.

#### **LD0495 - Sustainable Supply Chain Management and Risk (20 credits)**

The module will present you with the fundamental principles of contemporary Supply Chain Risk Management and Sustainable Supply Chain Management within a business context. This research informed module explores the ways in which good practice in these fields underpinned with theoretical relevance can contribute to optimisation of operational efficiency, organisational excellence, minimising organisational and environmental risk, achieving sustainable competitive advantage for the fruition of broader 'triple bottom line' (TBL) benefits.

Coventry CV2 1LX, UK

### **LD0422 - Dissertation Preparation and Research Methods (0 credits)**

In this module you will learn about a variety of different research methods. This will equip you with the knowledge and practical skills necessary for you to conduct research at Masters level and prepare you to complete a Masters dissertation or consultancy project. By the end of the module you will know how to apply both quantitative and qualitative data collection and analysis techniques.

### **LD0487 - Strategic Procurement and Logistics (20 credits)**

This module aims to provide you with an appreciation of the synergy between strategic procurement and logistics management. The focus is given to processes that add value through the production and delivery of services and products in the supply chain, and the tools needed to manage these processes effectively. Furthermore, you will be given a comprehensive understanding of modern approaches to strategic procurement and logistics management throughout the supply chain. On completion of the module you will be able to critically analyse the approaches to managing procurement and logistics management used by a variety of product and service organizations operating in a global business environment.

### **LD0473 - Developing Global Management Competencies II (20 credits)**

Developing Global Management Competencies II facilitates and supports you to develop and refine relevant and up-to-date employability skills, and in so doing enables you to recognise and articulate how you can demonstrate your potential added value to organisations. You will learn about the development of practical skills and the techniques required by businesses to help in project management and the implementation of data management and data analytics solutions. The module will also introduce some project management processes, frameworks and methodologies.

### **LD0475 - Academic and Professional Development (0 credits)**

The module is designed to facilitate the development of the student learning experience over the course of their oneyear full time Masters programme. Academic and Professional Development activities will be delivered, where appropriate, in parallel with Academic Skills (ASK) sessions. Both will be mapped to support student academic skills and professional development to support the delivery of programme modules.

You will also choose one of the following modules.

### **LD0477 - The Newcastle Business School Masters Consultancy Project (60 credits)**

On this consultancy based module you will enhance your individual effectiveness and employability skills by locating the learning and development in an organisational context. In doing so, you will promote personal and group development, commercial awareness, and a range of inter-personal, intellectual and practical skills and knowledge centred on and demonstrated through a group negotiated real-time work-based project. In undertaking this project based module, you will critically reflect and evaluate upon organisational practices and their relation with academic theory, and in doing so, provide practical and actionable recommendations through an investigative management report

### **LD0480 - The Newcastle Business School Masters Dissertation (60 credits)**

You will design a research project, assessed through a proposal and will then work under supervision of a member of academic staff to use and extend the knowledge and skills that you have acquired during your

Coventry CV2 1LX, UK

programme of study to complete a dissertation. You will use appropriate research methodologies and data collection methods to critically synthesise a body of knowledge relevant to the taught programme. In this module you will gain an understanding of the academic skills that are required to produce a Masters Dissertation. By the end of the module you will have written a 3000 word dissertation proposal and a 15000 word Masters dissertation.

Please note that your tuition fees do not include the cost of course books that you may choose to purchase, stationery, printing and photocopying, accommodation, living expenses, travel or any other extracurricular activities. As a London Campus student, you will have full access to our online digital library with over 400,000 e-books and 50,000 electronic journals.

The modules you will study do not require you to purchase additional textbooks although we recommend you allow an additional £100 for the duration of your studies should you choose to purchase any additional reading materials.
